

Double44

The Double Sided 44mm profile is ideal as a sturdy profile to make double sided, non-illuminated frames.

They can either be suspended using adjustable cables and ceiling eyes or they can free stand using a variety of footplates from DPI.

Double Sided 44mm can be supplied in full lengths (6150mm) to be cut on site as required, it can be supplied in smaller lengths or it can be supplied cut and mitred to sizes ready for immediate use on site.

Complete frames can be built to almost any size and supplied flat packed for simple assembly on site.

Ordinarily, lengths over 3000mm are split and re-joined during assembly using the extension plugs supplied.

Double Sided 44mm can be supplied with a combination of recessed profile so items like feet or cables can be added and an aesthetically pleasing smooth faced profile on the visible sides.

This profile is supplied with either an anodised aluminium finish, Satin Black (RAL9005) or Satin White (RAL9003). Alternatively, it can be powder coated to any RAL colour required.
